Inside the Orion test capsule, NASA engineers secure a male and female test dummy in the crew seats in efforts to help ensure the crew's safety on future deep-space missions. Over 500 channels of DTS data recorders are onboard to capture critical test data, including the splashdown impact astronauts could experience when landing in the Pacific Ocean. ## DATA POINT

### DTS DAS Onboard NASA Orion Capsule

In the next phase of testing, engineers at NASA's Langley Research Center in Hampton, Virginia, will conduct nine water-impact drop tests to evaluate the Orion spacecraft and crew safety when they return from deep-space missions and touch down on Earth's surface. DTS data acquisition systems will ride onboard with the test dummies to collect critical test data as NASA prepares Orion for its next mission, Exploration Mission-1.

### NEW! SLICE PRO LAB Now Available

SLICE PRO LAB is a non-rugged, complete data acquisition system ideal for dummy calibration and static testing. The 19" rack includes an Ethernet Controller for start/status/power/comm and accommodates up to four SLICE PRO LAB modules (SIM, TOM or TDM). Compatible with both SLICEWare & DataPRO software.

### MIRA Selects DTS Data Recorders for UK Test Facilities

As part of a £16m investment, HORIBA MIRA Ltd. has purchased 1,000+ channels of DTS SLICE PRO and SLICE NANO data acquisition systems (DAS) for their five UK test facilities, including MIRA's Euro NCAP-accredited Safety Test Centre. The DTS equipment will be used for chassis, durability, impact testing, as well as occupant and pedestrian testing. MIRA's fleet of crash test dummies, which includes the state-of-the-art WorldSID and Q Series dummies, will feature SLICE NANO in-dummy DAS to assess occupant injury risk in lateral impacts which are required for consumer (NCAP) tests.

DTS is proud to be part of the investment which will significantly increase the test capacity, as well as ensure HORIBA MIRA can continue to provide testing to all global test standards.

## Sales Team Expands - Welcome Chad Ivan

**Chad Ivan**  
Eastern Region  
Sales Manager

Chad Ivan has joined DTS as the new Eastern Region Sales Manager in the United States. With 25 years of experience in dynamic testing, Chad is a great addition and is already busy supporting customers and working to expand market share for DTS products and services.

*"It is rare to find an organization that believes in building high quality equipment and having exceptional customer service, plus it's all backed by a strong vision for the future. Some people work their entire life and never have the opportunity to work for such an organization," said Chad.*

## DTS Engineers Inspire Local Students

Future Engineers: Students and faculty from the local Cabrillo High School in Long Beach got a first-hand look at DTS's corporate headquarters in Seal Beach, along with encouragement and advice on pursuing careers in technology fields. On learning about DTS sensors and data acquisition systems at the event, student Pastor Ochoa made this analogy: *"DTS truly is the 'Ferrari' of the test crash companies!"*

Crash Test Technology 101: Jenna Miller, DTS Applications Engineer (far left), shows students a working crash test dummy that has DTS data recorders and sensors embedded inside to provide valuable data to help improve occupant safety in everything from race cars to spacecraft, and helicopters to sports equipment.

## DTS Calibration Service Options

Only DTS can ensure your data recorders and sensors are calibrated to original factory standards. Multiple service options available:

- [Standard Calibration or ISO 17025](#) (A2LA accredited)
- [On-Site Service](#) helps keep busy test schedules on track
- [Service Contracts](#) save money, paperwork and time, includes unlimited repairs

Contact [customerservice@dtsweb.com](mailto:customerservice@dtsweb.com) for pricing and scheduling details.

---

Visit [DTS Careers](#) to see current openings including positions for:

- **Software/Firmware Engineers**
- **QA Electronic Test Technician**
- **Manufacturing Manager**

---

Visit the [DTS Help Center](#) 24/7/365 for technical support, manuals, product specifications, software and more.
