DATA POINT

Grand Opening - Michigan Technical Center

A ribbon cutting ceremony commemorated the opening of the new Technical Center in Novi, MI and the company's 25th anniversary.

From left: Steve Pruitt, DTS President/CEO; Mike Beckage, DTS CTO; Wayne Wrobel, Novi City Council Member; and Steve Moss, DTS Michigan.

Over 100 people attended the training sessions, including the popular **Principles of DAS & Sensors**.

Jenna Miller, DTS Field Service Engineer, lead a training session

Navigating Integrated Data Acquisition: Headforms, Legforms & ATDs.

Contact the DTS Sales team for more information on training,

including customized on-site options.

1,000 Channels of SLICE Sold for FLEX PLI Legs

According to the World Health Organization, more than 270,000 pedestrians lose their lives on the world's roads each year, accounting for 22% of the total 1.24 million road traffic deaths.

A record number of SLICE NANO channels have been sold for Flexible Pedestrian Legform Impactors (Flex PLI), making SLICE the leading embedded data acquisition system and an important part in the effort to make vehicles safer for both occupants and pedestrians.

Each Flex PLI supports up to 48 channels of embedded SLICE NANO.

The biofidelic Flex PLI represents a 50th percentile male leg and simulates the flexible

nature of the human bone. The legform is fired from a linear guide into the bumper of a static vehicle at 40 km/hr to assess pedestrian lower leg and knee injuries. An integral break-away cable allows cable-free operation, for true free-flight test dynamics. [More](#)

If Your ARS Does Not Say "PRO or HG" . . .

If your ARS (Angular Rate Sensor) is more than three years old, you may be missing out on performance features that are now standard. The sensing element in the current ARS PRO and ARS HG series offers proven higher-shock resistance and lower noise, making it the best performing ARS available for dynamic testing.

Ranges: ± 300 , 1500, 8000, 18000, 50000 deg/sec. Multiple bandwidths also available.

Welcome

Many customers have already had the pleasure of interacting with Lillian Fowler the new DTS Sales Administrator. Lillian is responsible for receiving and acknowledging POs for new product orders and is the direct contact for updates including order status, change orders and shipping details. With her experience in manufacturing and customer service, Lillian has jumped right in and we are happy to have her onboard at DTS headquarters in Seal Beach, California.

Lillian Fowler
Sales Administrator

Dawn Sup
Michigan Technical
Center Manager

Congratulations

Dawn Sup has been named Manager of the newly expanded DTS Michigan Technical Center in Novi, MI. Dawn joined DTS over 3 years ago after a career working directly with DTS products at the GM Milford Vehicle Safety & Crashworthiness Laboratory. In her new role, she will manage the day-to-day operations of the Michigan Technical Center, including supervising the technical support and office staff in addition to her role as Applications Engineer. Dawn has a BS in Electrical Engineering and a Masters in Engineering Management from the University of Detroit Mercy.
