Safety testing takes many forms - the new **HeadSAFE Impact Tester** is designed specifically for recreational surface testing such as playgrounds

DECEMBER 2016

New U.S. Sales Partners

We are pleased to announce our newest sales partners.

Engineering Solutions West:

Representing DTS in Northern California, Northern Nevada & Hawaii.

VIC MYERS ASSOCIATES, INC.
Instrumentation & Communication Solutions

Vic Myers Associates:

Representing DTS in Arizona, Colorado, New Mexico, Utah, Southern Nevada, Idaho, Wyoming, Montano and El Paso, Texas.

DATA POINT

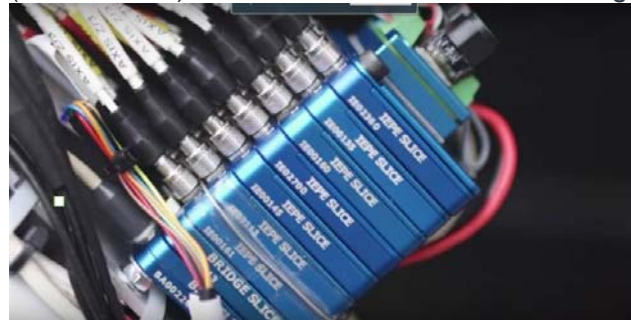

Making Playgrounds Safer

The new **HeadSAFE Impact Tester** makes it easy and precise to test a variety of recreational surfaces for injury assessment. The portable headform (simulating a child's head) is dropped from designated heights onto various surfaces and the data is used to calculate the potential for head injury. HeadSAFE is cable-free and features a built-in data logger with internal DC-response accelerometers ranged for surface testing making it ideal for both field inspectors and surface manufacturers. HeadSAFE is ASTM F1292 & EN 1177 compliant for international safety testing standards.

US Army Test & Evaluation Command Sergeant Major Andrew Connette meets WIAMan for the first time

The **Warrior Injury Assessment Manikin (WIAMan)** is the first blast test dummy designed specifically to withstand underbody blasts (like IEDs) to enhance current and future military vehicle designs and is part of ongoing efforts by the US Military to improve soldier safety.

The first prototypes, called Technical Demonstrators (pictured above), are currently being tested and evaluated by the US Army. WIAMan is designed to support up to 180 channels of miniature 6-channel DTS data acquisition modules that are distributed throughout the manikin. The next phase of the project includes Gen1 models that will be built, tested and evaluated in the new WIAMan lab being installed at DTS headquarters in California.

DTS is the Prime Contractor to the US Army for this important project, which includes designing the new ATD (anthropomorphic test device) and a next generation in-dummy DAS and sensor solution. Technical papers on WIAMan were presented at the [STAPP Car Crash Conference](#) in Washington D.C. last month.

New VP of Finance

DTS proudly welcomes Tony Jones in the new position of Vice President of Finance. Tony's primary focus is to develop strategies, budgets and forecasts to successfully direct and expand DTS growth.

"I am delighted to be part of an outstanding team focused on providing leading edge data acquisition systems that add value to society by making the world safer for our families," said Tony. "As a new member of the leadership team, I am excited to help implement flexible business systems and tools that

Tony Jones
VP of Finance

will support DTS during its next decade of successful growth."

The Gift of Sight

In this season of giving, DTS collaborated with the Lions Club to help sort and recycle nearly 7,000 pairs of glasses for those in need! Employees had the opportunity to participate in three short "sorting parties" to organize donations into categories like sunglasses, modern, children's, readers, and the classic "Big, Old or Ugly." DTS celebrated with a holiday BBQ cooked by the Lions Club that included an ugly sweater contest, tunes courtesy of the "DTS Band" and even some juggling!

In 1925, Helen Keller challenged the Lions to become "*knights of the blind in the crusade against darkness.*" They have been working on sight programs worldwide ever since. To donate glasses or volunteer, visit www.lionsclubs.org

Schedule 2017 Service Now

Don't miss a test date because of uncalibrated equipment! Only DTS can ensure your data acquisition systems and sensors are calibrated to original factory standards. Contact [Customer Service](#) for pricing and scheduling details.

- [Standard Calibration or ISO 17025](#) (A2LA accredited)
- [On-Site Service](#) helps keep busy test schedules on track
- [Service Contracts](#) save time and money with a custom service plan
